ANDROID DEVELOPER

Job Description

ABOUT US:

At GreedyGame, we are revolutionizing the way the world looks at mobile advertising. Every day, 7 million+ users get to enjoy a seamless and beautiful gaming experience because of our platform. We are looking for driven, forward-thinking, problem solvers to make this system bigger and better. GreedyGame is a platform which enables blending of ads within mobile gaming experience using assets like background, characters, power-ups through our SDK. It helps advertisers engage audiences while they are using apps or playing games and empowers developers to monetize their app development efforts through non-intrusive advertising.

JOB DETAILS:

Seniority Level: Mid-Senior level
Industry: Marketing & Advertising
Employment Type: Full-Time
Job Functions: Engineering, Information Technology
Job Location: Bengaluru

WHAT ARE WE BUILDING?

GreedyGame is building mobile first advertising solutions. We are a platform which enables blending of ads within mobile apps and games so that they become a part of the content. This allows developers to monetise their apps and games without degrading the user experience. Check out greedygame.com to know more!
